Problem Oriented Charting

New functionality has been rolled out in the Rounding navigator that will allow a provider to create a problem oriented progress note.

Step One: Create the Subjective and Objective Note

1. Access the Rounding Navigator.
2. Click Subjective/Objective (S/O) section open a blank note.
 - a. Providers can create their own S/O note or search for the specialty SmartText by typing “subjective” in the Insert SmartText window.
3. Once a S/O note has been created, it will pull in for subsequent S/O notes created by the same provider.

Step Two: Create Assessment and Plan

1. Click Problem List in the table of contents of the rounding navigator. Add problems appropriate for this patient's admission.
2. Click "Create Current Assessment & Plan Note" under the specific problem(s) the provider is addressing.
3. Create an assessment and plan note related to the specific problem.
 - a. Previous "Assessment & Plan Notes" will repopulate when the same providers creates subsequent notes. The provider will be able to update the information and refresh SmartLinks for the current note.
4. Click Accept.
5. Repeat steps 2-4 for each problem the provider wishes to address.

Problem List

+ Create Patient Care Coordination Note

Add a new problem + Add **1**

Show: ☐ Past Problems Options

Diagnosis Hospital Principal Sort Priority Resolved

Hospital (Problems being addressed during this admission)

▸ CAD (coronary artery disease) ☒ ☐ Unprioritized Change Dx Resolve

+ Create Current Assessment & Plan Note **2**

Present on Admission? Yes No ?

▾ Unspecified essential hypertension ☒ Unprioritized Change Dx Resolve

Details Code: 401.9 Noted: 04/09/2015 Updated: Today Physician, Hybrid

+ Create Overview

Current Assessment & Plan Note Your Assessment & Plan specific to the problem

Type your Assessment and Plan here for this problem **3**

This functionality creates an APSO note (as illustrated here) and will file as a progress note.

Physician, Hybrid	Physician	Signed	Neurosurgery	Progress Note										
PROGRESS NOTE														
Assessment & Plan														
CHF (congestive heart failure) Assessment & Plan Testing new note add it here														
Pneumonia, organism unspecified Assessment & Plan Edited for today Problem #1 Edit 2 this is added today														
PNC (postnecrotic cirrhosis) Assessment & Plan This is for testing only														
Stroke Assessment & Plan Testing problem oriented charting														
Subjective:														
Michael Willow is a 32 y.o. Caucasian female who presented with complaints of Testing this.														
Past Medical History <table border="1"> <thead> <tr> <th>Diagnosis</th> <th>Date</th> </tr> </thead> <tbody> <tr> <td>• Unspecified essential hypertension</td> <td></td> </tr> <tr> <td>• Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled</td> <td></td> </tr> <tr> <td>• Osteoporosis, unspecified</td> <td></td> </tr> <tr> <td>• PNC (postnecrotic cirrhosis)</td> <td></td> </tr> </tbody> </table>					Diagnosis	Date	• Unspecified essential hypertension		• Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled		• Osteoporosis, unspecified		• PNC (postnecrotic cirrhosis)	
Diagnosis	Date													
• Unspecified essential hypertension														
• Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled														
• Osteoporosis, unspecified														
• PNC (postnecrotic cirrhosis)														
No past surgical history on file. No Known Allergies														
Objective:														

Provider's individual notes are not shared with other clinicians until the progress note is signed.

Hyperlinks available in Problem List Section of the Rounding Navigator:

1. Last Assessment & Plan Note – displays the last A/P note created by the reviewing provider.
2. View All Notes – opens a report with all past Assessment and Plan notes for the admission.
